

Mohammad Hammad Khan

Lucknow, India | +91 7355216070 | indiahammad1947@gmail.com

[linkedin.com/in/hammad-khan-47864a28a](https://www.linkedin.com/in/hammad-khan-47864a28a) | github.com/Hector-404 | Reg No: 23BCE10210

TECHNICAL SKILLS

- **Languages:** Java, Python, HTML5, CSS3, JavaScript (ES6+)
- **Frontend & Frameworks:** UI Web Workflows, Streamlit
- **Backend, Databases & APIs:** FastAPI, REST APIs, DBMS (Database Management Systems), Operating Systems (OS)
- **Cloud, AI & Developer Tools:** Google Cloud Stack, OpenAI API, PaLM API, AI/NLP Processing, Git, GitHub, Uvicorn, Virtual Environments
- **Core Competencies:** Data Structures & Algorithms (DSA), Git

EDUCATION

VIT Bhopal University

B. Tech in Computer Science & Engineering (CSE) | 2023 - 2027 | CGPA: 8.32 / 10

City Montessori School, Lucknow

Class XII - ISC | Completed: July 2022 | Aggregate: 96.00%

City Montessori School, Lucknow

Class X - ICSE | Completed: March 2020 | Aggregate: 97.60%

PROJECTS

ExamForge — AI-Powered Exam Preparation & Notes Processing Platform (Ongoing)

<https://github.com/Hector-404/ExamForge>

- Developing an AI-powered backend for automated educational content processing, enabling structured note cleaning, summarization, and concept explanation via modular API-driven workflows.
- Engineering a scalable FastAPI backend with RESTful endpoints and reusable processing modules to support dynamic, intelligent text transformation and future assessment generation capabilities.
- Designing local development infrastructure using Python, Uvicorn, and Git, implementing virtual environment isolation and modular service organization to ensure reliable API execution.
- **Technologies:** Python, FastAPI, Uvicorn, REST APIs, AI/NLP Processing, Git, GitHub, Virtual Environments

CodeCrafters Shell — Unix Shell Built in Java (Ongoing)

- Built a Unix-like command-line shell in Java supporting built-in commands including echo, pwd, cd, type, and exit.
- Implemented execution of external programs using Java's ProcessBuilder, handling process creation, argument passing, and terminal I/O.
- Developed a custom command tokenizer supporting quoted strings, whitespace handling, and shell-style argument parsing.
- Implemented executable discovery by searching directories listed in the system PATH environment variable, enabling execution of external commands similar to Unix shells..
- **Technologies:** Java, ProcessBuilder, Java File APIs, Operating Systems, Git, GitHub

CLOUD & AI CERTIFICATIONS

Google Cloud Platform — Generative AI Specialist

- Learned to assess, fine-tune, and apply Large Language Models (LLMs) for content generation using Google's Generative AI stack.

EXTRACURRICULARS & LEADERSHIP

- **Project Exhibition Lead:** Twice spearheaded end-to-end full-lifecycle prototyping workflows by directly coordinating a 5-member cross-functional peer team.
- **Tech Team Core Member (iCreate Club):** Collaborated on technical system updates, structural code execution, and student-led development projects within the framework.
- **Photography Team Lead (Vitera Club):** Headed live visual asset production, arranged scheduling configurations, and managed media coverage for multi-department university events.
- **Competitive Coding:** Successfully completed multiple backend algorithmic coding challenges organized directly by the institutional Placement Cell.
